## Zebras by \_\_\_\_\_

Originally designed in 1945 by Flora Scalamandré for the then newly opened Gino of Capri restaurant on the Upper East Side, Zebras features an animated sketch of two Zebras prancing around politely placed arrows on top of a lively red color wallpaper. The playful design was an instant hit and was immortalized in films such as "Mighty Aphrodite" and "The Royal Tenenbaums." Zebras has proven to be an industry favorite and beyond as it remains highly used, and highly recognized across the world. Channel your energy into coloring our iconic Zebras motif and create something beautiful!
